Email: kumaravinash7033030042@gmail.com

GitHub: <https://github.com/avinash7033030042>

Mobile: +91- 7033030042

SKILLS

• Languages:	C, C++, Java, Python, JavaScript, PHP
• Frameworks:	React.js, Tailwind CSS
• Tools/Platforms:	MySQL, AWS, Git, GitHub
• Backend:	Node.js, Express.js
• Soft Skills:	Problem-Solving, Communication, Adaptability

PROJECTS

Alumni Portal Website GitHub Live Link	Mar 25 - Apr 25
- Developed an interactive Alumni Portal to seamlessly connect alumni and students with features like profile management, event updates, job postings, and real-time communication. - Implemented secure user authentication, profile management, and database connectivity using PHP and MySQL. - Designed and built a structured MySQL database schema to ensure efficient user data storage and retrieval. Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, GitHub.	
Flashcards App GitHub Live Link	Feb 25 - Mar 25
- Integrated secure authentication, advanced dynamic deck search, various multiple study modes, and a comprehensive admin dashboard to significantly enhance overall user experience. - Optimized backend logic and database queries, effectively improving response time by 20% significantly. - Implemented CRUD operations to manage flashcard data efficiently, supporting multiple user interactions. Tech Stack: HTML, CSS, JavaScript, PHP, MySQL, GitHub.	

TRAININGS

Full Stack Development in React and Node LPU Link	Jul 25
- Gained practical, hands-on experience in modern scalable full-stack web development using React.js and Node.js. - Built a route-optimization app with dynamic maps and backend algorithms for fast, real-time route calculations, significantly improving overall functionality and user experience through optimized data processing. - Enhanced debugging, performance optimization, and team collaboration skills through agile methodologies and version control practices in cross-functional development environments. Tech Stack : React.js, Node.js, Express.js, Git/GitHub.	
C++ With Data Structures and Algorithms Training LPU Link	Dec 24
- Undertook C++ with Data Structures and Algorithms training, gaining hands-on experience in implementing efficient problem-solving techniques using arrays, linked lists, stacks, queues, trees, and graphs. - Implemented sorting, searching, recursion, and dynamic programming algorithms on real-world problems, significantly enhancing computational efficiency, logical reasoning, and problem-solving skills. - Strengthened understanding of object-oriented programming concepts, time and space complexity analysis, and optimized code design for real-world scalable software applications. Tech Stack: C++, STL, Data Structures & Algorithms.	

CERTIFICATIONS

• Software Engineering Job Simulation Forage Link	Feb 26
• Privacy and Security in Online Social Media NPTEL Link	Oct 25
• Responsive Web Design Free Code Camp Link	Oct 23

ACHIEVEMENTS

• Solved 250+ Data Structures and Algorithms problems on LeetCode and GeeksforGeeks, improving problem-solving efficiency and time complexity analysis.	Feb 26
• Participated in the Binary Blitz Web Hackathon, demonstrating strong web development and problem-solving skills, collaborating effectively within a fast-paced competitive team environment.	Oct 25

EDUCATION

• Lovely Professional University Bachelors of Technology CGPA: 5.25	Punjab, India Aug 23 - Present
• SLNM High School Intermediate Percentage: 65%	Choraut, Bihar Aug 21 - Mar 23
• SLNM High School Matriculation Percentage: 76%	Choraut, Bihar Aug 20 - Mar 21
